

To potential costumers of Magnum Machine
Of Marshall, Texas
From UAB Iviltra, Lithuania

12/12/2011

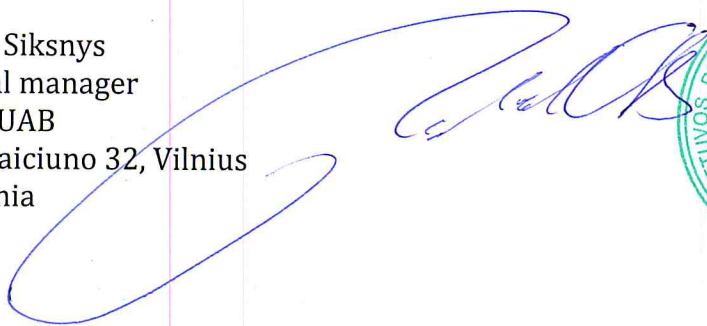

We bought Magnum slabbing Machine half a year ago. In the time our installation Mr. Kenneth Fitzgerald personal came to our plant with aim to help us install this Machine and teach us how to work with this equipment.

During our several months of using it we have no at all any problems with this equipment. It is very easy in use and taking care about it. We are definitely happy about this slabbing Machine.

If potential clients of this equipment are in Europe they are very welcome to come and to see it by themselves.

Sincerely,

Valdas Siksnys
