SUBJECT: REFERENCE FOR MAGNUM MACHINE

TO WHOM IT MAY CONCERN

We purchased our first Magnum slab machine in year 2000. This was based on the performance of the slabber at another plant. Since then we have purchased an additional three Magnum slabbers. We have modified an existing machine (made by another Vendor) to have Magnum plates and ram.

Magnum provides excellent service and technical help. Magnum has always met promised delivery times.

Improvements in design - Magnum has worked to continually improve the design of the machine. The latest design can take higher pressures and is less susceptible to leaks, particularly when compared to the competition.

Overall we are very satisfied with Magnum and highly recommend Magnum as a quality supplier.

Regards
